

My Own Shower

One-time Installation:

1. (A) Remove your showerhead. Adjustable wrench or pliers may be needed to remove showerhead. To prevent scratching, always cover parts with a cloth before using a wrench or pliers.
2. (B) Wrap pipe threads with the enclosed plumbers tape. This produces a better seal and prevents possible leaking. Twist Rinse Ace® connector onto your shower pipe. Exposed threads will not affect the seal. The Rinse Ace® connector should twist on easily by hand. If you have difficulty, remove the connector, change the angle to align the threads and try again. **DO NOT FORCE THE CONNECTOR**—this could strip the connector threads. Hand-tighten only to prevent damaging the Rinse Ace® connector.
3. Wrap the connector threads with the enclosed plumbers tape. Reattach the showerhead—**DO NOT FORCE**. Exposed threads on the connector will not affect the seal. Hand-tightening is sufficient.

To Use My Own Shower:

- (C) Attach the hose by aligning the tabs on hose end with notches in Shower Connector opening. Push in and twist clockwise to lock. *Water will not come through the “adult” showerhead when the hose is attached.*
- Place showerhead on the wall with suction cups. Turn on shower and adjust water temperature for your child’s comfort
- When shower is over, turn off water, twist the hose counterclockwise to unlock and pull straight out. Drain remaining water from hose and coil for easy storage.
-
