

4 Settings 84 jet showerhead... Pause mode to save water... Full body coverage... Massaging mode concentrated spray...
Combination spray

The “Quick-Connect” 6 foot hose is great for cleaning the tub and shower, rinsing children’s hair, bathing pets, assisted bathing, watering plants, cleaning large items and more. Snap in anytime for all your rinsing needs! No permanent hose to clutter your shower! Appreciate what no other showerhead can offer!

Rinse Ace® 2-in-1 Convertible Showerhead™ One-time Installation:

1. (A) Remove your showerhead. Adjustable wrench or pliers may be needed to remove showerhead. To prevent scratching, always cover parts with a cloth before using a wrench or pliers.
2. Wrap pipe threads with enclosed Teflon® tape. Attach the Rinse Ace® 2-in-1 Convertible Showerhead™ using your hand or a wrench **ONLY ON THE THREADED JOINT**. **Do not twist Rinse Ace® 2-in-1 Convertible Showerhead™ on to shower arm by holding hand over showerhead sprayface.** Exposed threads on the showerarm will not affect the seal.

See easy installation and use video at: <http://bit.ly/jSv5Sh>

To Use Sprayer:

1. (B) Place one hand behind the Rinse Ace® 2-in-1 Convertible Showerhead™ for leverage. With your other hand, align tabs on hose end with notches in center of Rinse Ace® 2-in-1 Convertible Showerhead™. Push in and twist clockwise 90° to lock. *Water will not come through the showerhead when the hose is attached.*
2. Turn on shower. *Water will come out of the hose only when the sprayer lever is pressed*—this water-saving feature lets you perform other tasks without having to shut off the water. When water is turned on, never leave the hose unattended.
3. When rinsing is complete, turn off water. Twist the hose counterclockwise 90° to unlock and pull straight out. Press sprayer handle to drain remaining water in the hose. Coil hose for easy storage.

Helpful Hints:

- If you experience difficulty plugging in the hose, the black o-ring may be dry. Lubricate it with petroleum jelly or placing it in water. Running water through the showerhead may also help.
- If you experience water flowing from the center of the Rinse Ace® 2-in-1 Convertible Showerhead™ (where hose connects), the clear plastic plunger is incorrectly seated. With the hose end, quickly push in hose several times to dislodge plunger. You may hear a “click” sound.
- As a precaution, always check the water temperature before spraying a person, pet or spraying a plant. Check water temperature by pressing the sprayer lever, letting water flow from the sprayer briefly, then spraying water on your hand. Always check the water temperature after leaving hose idle if the water has not been turned off.
- If the sprayface is difficult to turn, loosen the center of the Rinse Ace® 2-in-1 Convertible Showerhead™ (where you connect the hose) by plugging in the hose and twisting slightly counterclockwise.
